Art Unit: 1655

Newly submitted claim 23 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The original claims were directed to a method of mimicking caloric restriction and the newly submitted claims are directed to a method of lowering body temperature. The methods are distinct and independent.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 16, 17, 22, and 23 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Chapnick (6,896,914) with a priority date of 10/26/2001 teaches methods of treatment by administering mannoheptulose.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1655

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
